**Subject: Compatibility of patented Novinium® Injection Adaptors with Richards Manufacturing molded components**

To whom it may concern:

Novinium engaged NEETRAC to perform ANSI C119.4 tests on Novinium injection adaptors (IA's) installed on field-shortened copper-top compression connectors. NEETRAC has certified the performance of the Novinium modifications to the standard just as Richards Manufacturing would have done.

When Novinium IAs are installed as per the Novinium IA installation instructions, the IA-compression connector assembly falls within the conductive insert of all Richards Manufacturing medium voltage elbows and splices.

Richards Manufacturing is not aware of any design disharmonies which might occur from the combination of properly assembled Novinium IA's in Richards Manufacturing medium voltage elbows and splices.

Richards Manufacturing makes no warranties, expressed or implied, regarding the performance of Novinium technology when used in combination with Richards Manufacturing medium voltage elbows and splices.

Sincerely,
